UNITED NATIONS CONFERENCE ON SUSTAINABLE DEVELOPMENT: 13-22 JUNE 2012

The third and final meeting of the Preparatory Committee for the United Nations Conference on Sustainable Development (UNCSD, or Rio+20) will open today in Rio de Janeiro, Brazil. Following the conclusion of the PrepCom, the Conference itself will convene on Wednesday, 20 June 2012.

The PrepCom will continue negotiating the draft outcome document as it emerged on 2 June from the third round of informal consultations at UN Headquarters in New York. The PrepCom is also expected to adopt the provisional rules of procedure for the conference.

The formal opening plenary meeting for the Conference will be held during the morning of Wednesday, 20 June, and will consider all procedural and organizational matters. The plenary meeting will also hear statements from the President of the Economic and Social Council and the nine major groups.

At the ceremonial opening of the Conference, which will be held in the afternoon of Wednesday, 20 June, the President of the Conference, the President of the General Assembly, the Secretary-General of the United Nations and the Secretary-General of the Conference will address participants. In addition to a general debate, the Conference will feature four high-level roundtable sessions on “Looking at the way forward in implementing the expected outcomes of the Conference.”

A BRIEF HISTORY OF UN SUSTAINABLE DEVELOPMENT CONFERENCES

The United Nations Conference on Sustainable Development (UNCSD or Rio+20) will mark the 40th anniversary of the first major international political conference that specifically had the word “environment” in its title. Taking place in June 2012, the UNCSD seeks to secure renewed political commitment for sustainable development, assess progress and implementation gaps in meeting previously-agreed commitments, and address new and emerging challenges. The conference will focus on the following themes: a green economy in the context of sustainable development and poverty eradication, and the institutional framework for sustainable development (IFSD).

STOCKHOLM CONFERENCE: The UN Conference on the Human Environment (UNCHE) was held in Stockholm, Sweden, from 5-16 June 1972, and produced three major sets of decisions: the Stockholm Declaration; the Stockholm Action Plan, made up of 109 recommendations on international measures against environmental degradation for governments and international organizations; and a group of five resolutions calling for a ban on the testing of nuclear weapons, the creation of an international databank on environmental data, actions linked to development and the environment, the creation of an environment fund, and establishing the UN Environment Programme (UNEP), which was charged with providing the central node for global environmental cooperation and treaty making.

BRUNDTLAND COMMISSION: In 1983, the UN General Assembly (UNGA) established an independent commission to formulate a long-term agenda for action. The World Commission on Environment and Development—more commonly known as the Brundtland Commission, named for its Chair, Gro Harlem Brundtland—subsequently issued its report in 1987, Our Common Future, which stressed the need for development strategies in all countries that recognized the limits of the ecosystem’s ability to regenerate itself and absorb waste products. The Commission emphasized the link between economic development and environmental issues, and identified poverty eradication as a necessary and fundamental requirement for environmentally sustainable development.

UN CONFERENCE ON ENVIRONMENT AND DEVELOPMENT: UNCED, also known as the Earth Summit, was held from 3-14 June 1992, in Rio de Janeiro, Brazil, and involved over 100 Heads of State and Government, representatives from 178 countries, and some 17,000 participants. The principal outputs of UNCED were the Rio Declaration on Environment and Development, Agenda 21 (a 40-chapter programme of action) and the Statement of Forest Principles. The UN Framework Convention on Climate Change and the Convention on Biological Diversity were also opened for signature during the Earth Summit. Agenda 21 called for the creation of a Commission on Sustainable Development (CSD) as a functional commission of the UN Economic and Social Council (ECOSOC) to ensure effective follow-up of UNCED, enhance international cooperation, and examine progress in implementing Agenda 21 at the local, national, regional and international levels.

WORLD SUMMIT ON SUSTAINABLE DEVELOPMENT: The WSSD met from 26 August - 4 September 2002, in Johannesburg, South Africa. The goal of the WSSD, according to UNGA Resolution 55/199, was to hold a ten-year review of UNCED at the summit level to reinvigorate the global commitment to sustainable development. The WSSD gathered over 21,000 participants from 191 countries. Delegates negotiated and adopted the Johannesburg Plan of Implementation (JPOI) and the Johannesburg Declaration on
Sustainable Development. The JPOI is designed as a framework for action to implement the commitments originally agreed at UNCED. The Johannesburg Declaration outlines the path taken from UNCED to the WSSD, highlights challenges, expresses a commitment to sustainable development, underscores the importance of multilateralism, and emphasizes the need for implementation.

**UNGA 64:** On 24 December 2009, the UN General Assembly adopted Resolution 64/236 and agreed to convene the UNCSD in 2012 in Brazil. Resolution 64/236 also called for holding three Preparatory Committee (PrepCom) meetings prior to the UNCSD. On 14 May 2010, UN Secretary-General Ban Ki-moon announced the appointment of UN Under-Secretary-General for Economic and Social Affairs Sha Zukang as Secretary-General for the Conference. The UN Secretary-General subsequently appointed Brice Lalonde (France) and Elizabeth Thompson (Barbados) as executive coordinators.

**UNCSD PREPCOM I:** This meeting was held from 17-19 May 2010, at UN Headquarters in New York. The PrepCom assessed progress to date and the remaining gaps in implementing outcomes of major summits on sustainable development, as well as new and emerging challenges, a green economy in the context of sustainable development and poverty eradication, and the IFSD. Participants also organized their work in the lead-up to 2012, and considered the UNCSD’s rules of procedure.

**FIRST INTERSESSIONAL MEETING:** This meeting convened at UN Headquarters from 10-11 January 2011. Delegates listened to a summary of the findings of the Synthesis Report on securing renewed political commitment for sustainable development. Panel discussions were held on the green economy in the context of sustainable development and poverty eradication, and on the IFSD.

**UNCSD PREPCOM II:** This meeting took place from 7-8 March 2011, also at UN Headquarters. Delegates discussed progress to date and remaining gaps in the implementation of the outcomes of the major summits on sustainable development, addressed new and emerging challenges, discussed the scope of a green economy and the idea of a “blue economy,” and debated the IFSD. At the end of the meeting, a decision was adopted on the process for preparing the draft outcome document for the UNCSD.

**UNCSD REGIONAL AND SUB-REGIONAL MEETINGS:** During the second half of 2011, a series of regional and sub-regional meetings were held to prepare inputs for the UNCSD preparatory process. These included three sub-regional preparatory meetings for small island developing states (SIDS), as well as regional meetings organized by the UN regional economic and social commissions.

During the **Regional Preparatory Meeting for Latin America and the Caribbean,** held in Santiago, Chile, from 7-9 September 2011, delegates called for better ways to measure the wealth of countries that adequately reflect the three pillars of sustainable development, and a flexible and efficient global IFSD ensuring effective integration of the three pillars. They also discussed a proposal from Colombia and Guatemala to launch a process to develop sustainable development goals (SDGs).

The **Arab Regional Preparatory Meeting** took place from 16-17 October 2011, in Cairo, Egypt. Delegates highlighted the lack of a universal definition of green economy and agreed that it should be a tool for sustainable development rather than a new principle that might replace sustainable development. Participants also highlighted the need for balance among the three pillars of sustainable development.

The **Regional Preparatory Meeting for Asia and the Pacific** took place from 19-20 October 2011, in Seoul, Republic of Korea. Although many found merit in the idea of a green economy, some noted that it should not lead to protectionism or conditionalities. On IFSD, while many favored “strengthening”
